

## Completing a whole number

### Grade 5 Fractions Worksheet

Find the missing fraction or mixed number.

1)  $5\frac{1}{2} + \underline{\hspace{2cm}} = 7$

2)  $2\frac{3}{7} + \underline{\hspace{2cm}} = 4$

3)  $7\frac{2}{4} + \underline{\hspace{2cm}} = 9$

4)  $5\frac{2}{3} + \underline{\hspace{2cm}} = 7$

5)  $3\frac{3}{4} + \underline{\hspace{2cm}} = 5$

6)  $5\frac{4}{5} + \underline{\hspace{2cm}} = 7$

7)  $2\frac{2}{7} + \underline{\hspace{2cm}} = 4$

8)  $7\frac{2}{3} + \underline{\hspace{2cm}} = 8$

9)  $2\frac{1}{6} + \underline{\hspace{2cm}} = 3$

10)  $2\frac{3}{6} + \underline{\hspace{2cm}} = 4$

11)  $5\frac{2}{6} + \underline{\hspace{2cm}} = 7$

12)  $2\frac{6}{10} + \underline{\hspace{2cm}} = 3$

13)  $3\frac{1}{6} + \underline{\hspace{2cm}} = 4$

14)  $5\frac{4}{5} + \underline{\hspace{2cm}} = 8$

15)  $8\frac{1}{2} + \underline{\hspace{2cm}} = 9$

16)  $9\frac{1}{2} + \underline{\hspace{2cm}} = 10$

Julia is filling up her fish tank with water and needs a total of **10** gallons of water. She has already poured in  $6\frac{1}{2}$  gallons of water. How many more gallons of water does she need to add to reach the total of **10** gallons?

Answer:

## Answers

1)  $1\frac{1}{2}$

2)  $1\frac{4}{7}$

3)  $1\frac{1}{4}$

4)  $1\frac{1}{3}$

5)  $1\frac{1}{4}$

6)  $1\frac{1}{5}$

7)  $1\frac{5}{7}$

8)  $\frac{1}{3}$

9)  $\frac{5}{6}$

10)  $1\frac{3}{6}$

11)  $1\frac{4}{6}$

12)  $\frac{4}{10}$

13)  $\frac{5}{6}$

14)  $2\frac{1}{5}$

15)  $1\frac{1}{2}$

16)  $\frac{1}{2}$

Answer:  $3\frac{1}{2}$  gallons of water
