

Completing a whole number

Grade 5 Fractions Worksheet

Find the missing fraction or mixed number.

1) $13\frac{4}{5} + \underline{\hspace{1cm}} = 24$

2) $64\frac{1}{5} + \underline{\hspace{1cm}} = 84$

3) $32\frac{2}{4} + \underline{\hspace{1cm}} = 63$

4) $25\frac{4}{6} + \underline{\hspace{1cm}} = 26$

5) $46\frac{2}{3} + \underline{\hspace{1cm}} = 70$

6) $12\frac{1}{6} + \underline{\hspace{1cm}} = 27$

7) $10\frac{3}{4} + \underline{\hspace{1cm}} = 55$

8) $75\frac{1}{3} + \underline{\hspace{1cm}} = 77$

9) $87\frac{6}{9} + \underline{\hspace{1cm}} = 88$

10) $46\frac{2}{3} + \underline{\hspace{1cm}} = 49$

11) $22\frac{1}{3} + \underline{\hspace{1cm}} = 36$

12) $37\frac{1}{3} + \underline{\hspace{1cm}} = 50$

13) $75\frac{3}{9} + \underline{\hspace{1cm}} = 76$

14) $56\frac{1}{3} + \underline{\hspace{1cm}} = 79$

15) $38\frac{1}{5} + \underline{\hspace{1cm}} = 51$

16) $15\frac{8}{12} + \underline{\hspace{1cm}} = 16$

Ethan is pouring sand into a sandbox that needs a total of 25 pounds of sand. He has already added $18\frac{1}{4}$ pounds. How many more pounds of sand does he need to add to reach the total amount?

Answer:

Answers

1) $10\frac{1}{5}$

2) $19\frac{4}{5}$

3) $30\frac{2}{4}$

4) $\frac{2}{6}$

5) $23\frac{1}{3}$

6) $14\frac{5}{6}$

7) $44\frac{1}{4}$

8) $1\frac{2}{3}$

9) $\frac{3}{9}$

10) $2\frac{1}{3}$

11) $13\frac{2}{3}$

12) $12\frac{2}{3}$

13) $\frac{6}{9}$

14) $22\frac{2}{3}$

15) $12\frac{4}{5}$

16) $\frac{4}{12}$

Answer: $6\frac{3}{4}$ pounds of sand
